

EXTRA-WIDE CORNER TAPE

Update : 10/2023

DESCRIPTION

The extra-wide corner tape can be used to reinforce plasterboard corners for BA18 or BA25 plasterboard in double skin installations (2x BA13).

ADVANTAGES

- Large 80mm width
- Good overlap of plasterboard edges
- Invisible after finishing
- High resistance

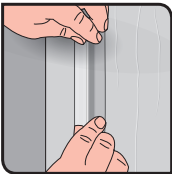

APPLICATION

Reinforcement of plasterboard corners.

INSTALLATION TIPS

1. Apply a coat of plasterboard joint filler adhesive over 50 to 60 mm on each side of the corner and position the reinforced strip.

2. Fold the strip to form an angle and press the reinforced strip onto the plasterboard joint adhesive using the plastering knife (tighten the strip).

3. Cover the reinforced strip with two coats of plasterboard jointing adhesive (filler and finish).
