99.

OVER 99%
NATURAL MATERIALS
FOR BETTER INTERIOR AIR QUALITY

SEMIN 99.
The first eco-friendly range

THE FIRST ECO-FRIENDLY RANGE

BEST FOR PEOPLE !

With our new 99 filler Range, we stand out as a leader in environmental friendly solutions for building.

1 THE MOST NATURAL AND ENVIRONMENTALLY RESPONSIBLE COMPOSITION POSSIBLE

These revolutionary fillers are free of petroleum-based substances and synthetic resins and contain between 99.2% and 99.9% natural raw materials.

- Natural plaster
- Marble powder
- Clay
- Wheat bark
- Potato starch
- Corn husk
- Gelatin
- Cellulose

The remaining 0,1% is cellulose ether, a natural product that has been chemically processed before being added to our mix.

Environmental-friendly sourcing with wheat, potato, and maize starches produced from :

96% IN FRANCE
less than 185 kilometres from our factories, for less transport and thus lower CO2 emissions.

100% IN EUROPE

2 SIMPLY TECHNICALLY GOOD

Even without synthetic resins, 99. Fillers are technically as effective as conventional ones. They joint filler with the NFT30-608 standard for paint coatings and the EN 13-963 standard for plasterboard joint filler.

3 GOOD FOR BOTH USERS AND RESIDENT

Because of the composition, Range 99. significantly reduces air pollution inside buildings as soon as it is applied.

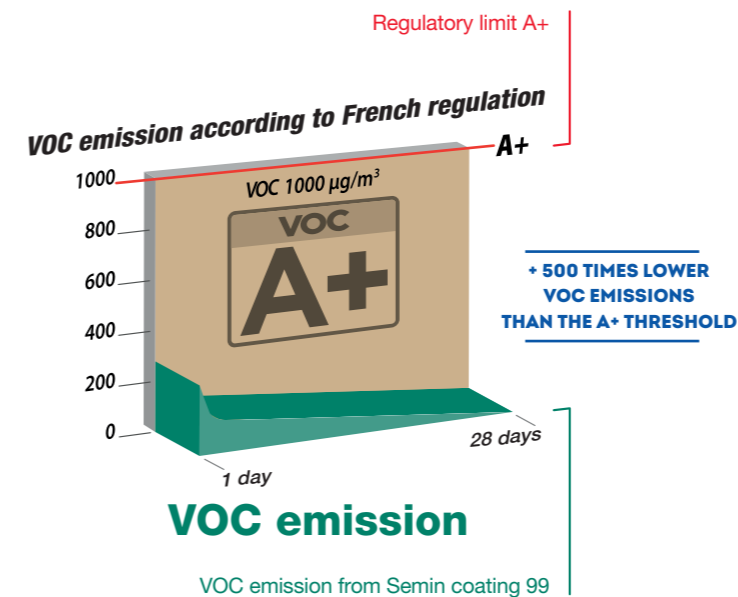

Using our 99. fillers means avoiding:

- Irritation risks
- Lung problems
- Headaches
- Vomiting

Strongly recommended for jobs in vulnerable people's homes (pregnant women, children, elderly people, asthmatics, etc.). Ideal for both building workers and residents.

500
TIME LESS
VOC'
THAN THE A+
THRESHOLD
AT 28 DAYS

10
TIME LESS
VOC'S
UPON APPLICATION

WHAT ARE VOC'S?

Volatile Organic Compounds are a cause of indoor air pollution. They can cause simple odour nuisance or irritation, but also reduced respiratory capacity, and even cancer. They are found in various building materials and products: paints, solvents, thinners, varnishes, glues, glazing products, fabrics, adhesives and coatings.

**EASY TO USE AND
LOW SHRINKING**

SEMIN 99.
INTERIOR FILLER

**STATE-OF-THE-ART-FINISHES AND
EXCELLENT SMOOTHING**

SEMIN 99.
INTERIOR SMOOTHING POWDER

Effective on a wide range of substrates

■ **99,2%**
natural raw materials:

natural plaster, marble powder, starch, cellulose, clay, gelatine

■ **0,8%**
cellulose ether

■ **0%**
synthetic resins

SUPPORTS

**interior wall and ceiling
substrates:**

- Plasterboards
- Plaster tiles
- Concrete
- Cellular concrete
- Brick
- Terracotta
- Cement base coat
- Gypsum plaster

Enhance your paint work with our ultra fine finish filler

■ **99,9%**
natural raw materials:

natural plaster, marble powder, starch, gelatine

■ **0,1%**
cellulose ether

■ **0%**
synthetic resins

SUPPORTS

**interior wall and ceiling
substrates:**

- Plasterboards
- Plaster tiles
- Concrete
- Gypsum plaster
- Cellular concrete
- Cement base coat
